

# LaVenture Middle School Addition Project

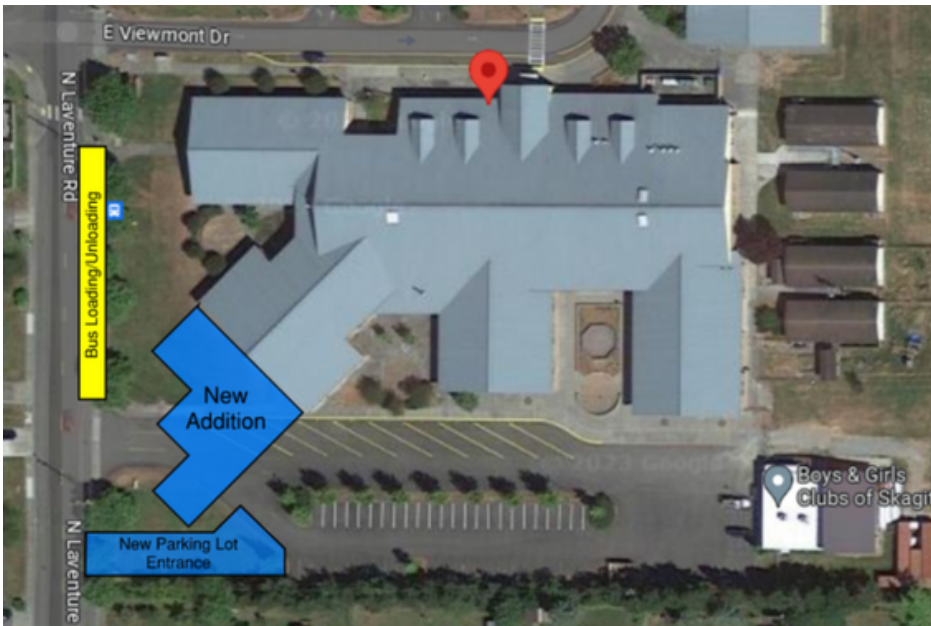

August 2023

## Nice to Meet You!

We are pleased to announce that the start of the early sitework for the new LaVenture Middle School Addition has started. While permitting is still in progress for the full construction of the building addition, we do have some exciting work that will be taking place over the next couple of months. The early site work permit includes grading of the site, installation of new storm water control systems, relocating the south parking lot entrance and utility work.

We are excited to join your community, and we understand that being a good neighbor is very important to Lydig Construction and Mount Vernon School District. While construction is inherently a disruptive process, it is always our goal to limit disruption to the greatest extent possible and be a positive member of your community while we are here.

Transparent and two-way communication is the number one tool we use to achieve these goals. In addition to this newsletter, we want to ensure you have a direct method to contact us with any questions or concerns if they arise. Please do not hesitate to contact us directly with the contact info at the bottom of this page.

## What to Expect During Construction

### Working Hours:

Standard working hours will be from 7AM - 4PM Monday - Friday. However, throughout the course of this project, we may stay late and/or work weekends to keep on schedule. In those circumstances, we abide by the City of Mount Vernon's noise and work hour ordinances: 7AM - 9PM Monday - Friday and 9AM - 7PM weekends.

### Deliveries:

The primary construction entrances will be off LaVenture Road. Deliveries will not be allowed outside of our working hours, but we appreciate your patience in advance.

### Noise & Vibration:

Lydig adheres to all local and state noise codes. Heavy machinery and construction equipment shall not be operated during non-working hours. Trucks and equipment idling will not be permitted to idle on site before 7AM. Please note the back-up alarms on our vehicles and equipment are required by WISHA and cannot be disabled.

### Personal conduct:

All Lydig employees and subcontractors undergo a mandatory safety and personal conduct orientation meeting. This includes but is not limited to site regulations on language, harassment, music/radios, tobacco use, litter, and leaving/entering the job site.
